

# *Healthy Village*

A healthy village is one where people plan together, keep their water clean, and look after each other.

**For community members**

## *Key messages*

- Hold regular village meetings about health and agree on actions together.
- Protect your water source. Keep it clean and covered, and keep animals away.
- Build and use toilets, and keep the village clear of rubbish.
- Support your village health worker, and take sick people to the health centre early.
- Look after the old, the sick and people with disabilities.

## ***Tell your village health worker or leader if***

- Many people become sick at the same time
- The village water source is dirty or has dried up
- A mother or child needs help getting to the health centre

*General information only. Follow the advice of your health centre and current national guidelines.*
