

Malaria

Malaria spreads through mosquito bites. It is dangerous, especially for babies, young children and pregnant women.

For community members

Key messages

- Sleep under a bed net every night.
- If you have a fever, get a test at the health centre or from your village health worker. Do not guess.
- If the test shows malaria, take the full course of medicine.
- Empty standing water around your house and clear long grass, where mosquitoes breed.
- Pregnant women and young children with fever must be seen quickly.

Go to the health centre now if there is

- Fever that will not go away or keeps coming back
- Fits or confusion
- Being very sleepy or hard to wake
- Vomiting again and again, or cannot drink
- Very pale skin or yellow eyes
- Fast or difficult breathing

General information only. Follow the advice of your health centre and current national guidelines.
